

## Starting Position for Magic Loop

1. All loops (or as many as can fit) should be on the wood or metal parts of the needles. These will have been roughly split in half before beginning, with one half(ish) on each needle.
2. Needles should be held with points to the right, with one needle in front of the other.
3. Fabric (or cast on ridge) should be moved so it is hanging down with no twists.
4. The working yarn should be attached to the back needle. (If not, rotate front needle to be in the back and check #3 again)

THEN, holding the loops with your left hand (hold front and back together), pull the back needle out to the right, in the direction it is pointing.
